

Kia Sportage

Movement that inspires

JUNE 2025

Overseas Model Shown

The new Sportage. It's what you've been waiting for.

With forward thinking design, next generation tech and efficient and responsive power, the Kia Sportage has been a Kiwi family favourite since it first launched here 30 years ago.

Now, with more interior space, next generation technology the addition of an ultra-efficient hybrid powertrain and the new Kia Sportage takes everything to the next level.

Movement that inspires

Overseas Model Shown.

Not just design. A philosophy.

There's no mistaking the Kia Sportage on the road. That's by design.

Opposites United is our design philosophy that shapes everything we create. Drawing inspiration from the natural and human worlds, it uses the principles of disruption and contrast to create a sleek and sophisticated look that is unmistakably Kia.

Family room.

The KiaSportage hasmoreroom insidefor everyone and everything, including up to 633 litres*ofrear cargospace.If you need more, a simple pull of a lever lowers the rear seats to reveal up to 1,919 litres* of cargo capacity.

The interior is loaded with creature comforts including dual zone climate control (Hybrid trims only), heated & ventilated front seats (X-Line only) and a Harman/Kardon eight speaker premium sound system (X-Line only).

*Light Hybrid trims only.

Little helpers.

Earth Hybrid & X-Line Hybrid models add thoughtful innovations, like a wireless phone charger that reminds you if you leave your phone behind or a smart tailgate that opens automatically when you have your hands full. When you're parking or moving at speeds below 20km/h, the Around-View Monitor* gives you a top-down view of your surroundings.

*Exclusive to X-line model.

Strength in numbers.

With seven airbags and multiple active safety systems, the Sportage is designed to protect inside and out.

Forward Collision Avoidance Assist with Junction View scans for vehicles at intersections, applying the brakes if it detects danger.

The Multi-Collision Braking system helps to reduce the risk of secondary collisions by

automatically applying the brakes once the airbags have been deployed after an initial impact.

Lane Follow Assist uses a combination of cameras and radar to maintain a safe distance from the vehicle ahead and to keep you safely in your lane.

More safety. More peace of mind.

When you activate the turn signal, the wide-angle side mirror mounted cameras will display live footage of your blind spots on the 12.3" instrument cluster.*

When parked or stopped, Safe Exit Warning will detect and warn you of approaching vehicles from behind on either side, alerting occupants with a sound and visual warning if they attempt to open the door into oncoming traffic.

Rear Seat Occupant Alert helps alert the driver to any passengers that may still be left in the vehicle when exiting.

*Blind Spot View Monitor exclusive to X-Line
